Product name

Diamond Render Sealer

Manufacturer

Produced by
Diamond Dry Mortars Inc.

Product description / General Purpose

Diamond Render Sealer is a water based Silane Siloxane sealer that is meant for sealing all cementitious and porous mineral products like render, skim coat, grout, concrete and natural stone.

The Sealer is a penetrating non film making type that leaves a matt surface. The sealer leaves the surface permeable for water vapor. The sealer improves water resistance, prevent efflorescence and lower material porosity. The sealer can be applied in one or two coats and is best applied by roller or brush.

PERFORMANCE BENEFITS

- Improve water resistance.
- Prevent efflorescence.
- Have water beading effect
- Reduce porosity
- good penetration into a variety of substrates.
- good rheology resulting in easy application.

Physical Properties

Colour	White, translucent
Coverage	100-150 ml/m ² Per coat If substrate is very porous the consumption will be higher.
Active component	Silane and siloxane
Specific gravity	1.03 kg/liter
PH Value	6-7
Shelf life	1 year
Packing	4 liter container
